Summary

First-year B.Tech student specializing in Artificial Intelligence and Machine Learning at JSS Academy of Technical Education, Noida. Proficient in Python, Django, and full-stack web development with hands-on experience building real-time applications and auction platforms. Actively preparing for open-source contributions including Google Summer of Code (GSoC), and passionate about continuous learning in software development.

Education

JSS Academy of Technical Education, Noida

Noida, Uttar Pradesh

Bachelor of Technology in Artificial Intelligence and Machine Learning

Sep 2025 – May 2029 (Expected)

Relevant Coursework: Web Development, Python Programming, Data Structures

Experience

Management Member

Noida, Uttar Pradesh

ISA JSSATEN (International Society of Automation – JSSATEN Chapter)

Dec 2025 – Present

- Contributed to organizing and executing technical events and workshops, supporting a community of 100+ engineering students.
- Coordinated cross-functional team activities by applying duty management skills to streamline chapter operations and event logistics.
- Engaged in knowledge-sharing sessions to mentor peers on emerging technologies, fostering a culture of collaborative learning.

Projects

Real-Time Chat Application

Python, Django, Django Channels, WebSockets, JavaScript

Feb 2026

- Architected a full-duplex real-time messaging system using Django Channels and WebSockets, enabling zero-latency communication between multiple concurrent users.
- Implemented asynchronous channel layers to handle instant message delivery, reducing message propagation time to near real-time performance.
- Built a dynamic JavaScript-driven chat interface with live DOM updates, ensuring seamless user experience without page reloads.

E-Commerce Auction Platform

Python, Django, HTML, CSS, SQLite

Jan 2026

- Developed a fully functional online auction platform supporting user authentication, live bidding, and watchlist management for multiple concurrent listings.
- Engineered a robust bidding system with Django ORM and SQLite backend, ensuring data integrity across all auction transactions.
- Designed responsive dynamic pages using Jinja2 templating, delivering an intuitive UI that streamlined the listing creation and bidding workflow.

Rock Paper Scissors Game

JavaScript, HTML, CSS

Feb 2026

- Developed a fully interactive browser-based game with real-time score tracking, delivering a smooth single-page experience without any backend dependency.
- Implemented core game logic and AI opponent behavior using vanilla JavaScript, achieving consistent and accurate outcome determination across all game states.
- Utilized event listeners and dynamic DOM manipulation to reflect game results and score updates instantly, improving user engagement and responsiveness.

Technical Skills

- **Languages:** Python, JavaScript, HTML, CSS, SQL
- **Frameworks & Libraries:** Django, Django REST Framework, Django Channels
- **Technologies:** WebSockets, REST APIs, Jinja2, SQLite
- **Developer Tools:** Git, GitHub, VS Code, Linux

Certifications & Activities

- Certificate of Participation – **Synapse AI Hackathon**, Delhi Technological University (DTU)
